Summary

The problem

For over 100 years CABI has created and disseminated vast amounts of information relevant to research and problem-solving. But much of this content is inaccessible.

What we are doing

CABI's new knowledge management programme aims to transform CABI's information technology. This means it cannot be relevant, authentic and up-to-date for the most vulnerable workers we support. We are efficient so if our products are

Results so far

grated with recent content to generate new knowledge. This means it cannot be relevant, authentic and up-to-date for the most vulnerable workers we support. We are efficient so if our products are
